

REDUCE ERRORS AND COSTS

Proven ROI with TVT, the Document Comparison Software for Life Sciences

Intensifying regulatory requirements leave no room for error when putting goods into the hands of patients and consumers.

50%

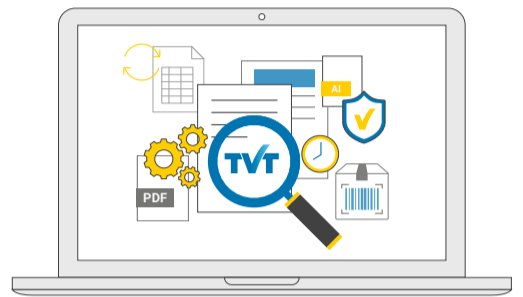

of product recalls are caused by packaging errors

\$1m - \$100m+

Typical recall cost

Using a document comparison software like TVT eliminates the risk of human error. It does not replace the need for the professional but allows users to quickly identify errors and inconsistencies in their **documentation, labeling, packaging**, and other materials that can lead to mistakes, misprints and recalls.

DANGERS OF MANUAL PROOFREADING

Potential for human error

Exposure to recalls and reprints

Inefficient use of employee time

High cost

Long and stressful process

HOW TVT IMPROVES THE PROOFREADING PROCESS

1

Increases accuracy

2

Eliminates the risk of human error

3

Shortens review times

4

Increases team productivity

5

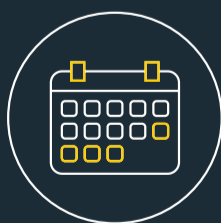

Ensures compliance and accountability across departments

With TVT, a typical like-for-like document comparison will take a matter of minutes, versus 3-4 hours if done manually by a human. A customer survey we conducted found that 74% of TVT users save a minimum of 1.5 hours per comparison.

74%
of TVT users save
1.5 hrs
per comparison

Companies save on average
5 hrs
per week

Average yearly saving of
\$14,500
or
€ 9,000
per user
